

## About Us

Established in the year 2007 and an ISO Certified Company. Kannith, is one of the reputed suppliers & wholesalers of steel products. Our products are highly demanded by our clients owing to their characteristics like durability, sturdy construction, dimensional accuracy and high tensile strength to name a few. These features are found in our products because of the fact that we use only good quality raw material while producing them.

Our sound infrastructure and our team of experts have together been a major aid to us in keeping our clients satisfied with our products. It is due to the efforts channelized by our learned professionals that we have been successful in developing a large product line. Our customized solutions and a large production capacity have also helped us gain the trust of our clients in the domestic market.

Under the protection and able guidance of our CEO, “Mr. Sandip Agarwal”, we have strengthened our financial position in the market to such an extent that our turnover at present touches Rs. 70 Cr. approximately. His wide industry experience and knowledge about the market trends inspire us to scale newer heights of success and deal with challenging times with mental firmness.

We are a renowned manufacturer, supplier, wholesaler and trader, engaged in the business of steel products. Our product range includes M.S. Channels, M.S. Angles, M.S. Rounds Bars, TMT Bar, H. R. Sheets and C. R. Sheets. Further, We Also Provide H. R. Plates, M.S. Flats, M.S. Beam, Finished Steel Products And M.S. Billets. Are The Other Products On Our List? All our products are made using cutting-edge technology & unprocessed material and can be customized by us to provide the finish, size and grade that the clients want. These are in high demand amongst our clients, especially those in building and construction industries.

## **Quality Assurance**

As a client-centric organization, we make sure that our products are of high quality, for which we use only good grade steel and other raw material. We procure raw material from respected and dependable vendors bearing the goal of quality in mind and, by this means, are able to keep our clients gratified. Our controllers see to it that our products meet the internationally prescribed quality norms. High Tensile Strength, Rust Resistance, Pressure and Temperature Resistance, Dimensional Accuracy & Durability are the parameters on the basis of which the quality of our products is tested by our analysts.

## **Client Satisfaction**

As we are a customer-oriented firm, one of our primary aims is to satisfy our clients to the topmost limit. Our product range is assured to be of supreme quality and made using the latest technology, which has helped us garner a number of clients in the domestic market. In addition to this, our ethical business practices, reasonable prices, timely deliveries, fair & transparent business dealings and easy terms & modes of payments have also helped us earn the trust of our clients. Our low turnaround time and wide distribution network have also helped us stand in good stead with our customers.

## **Infrastructure**

Our top-of-the-line infrastructure has been of immense help in delivering high quality products to our customers. We have also installed a coal fired furnace at our manufacturing unit for the purpose of heating up billets to the temperature of 1200 degree Celsius. In fact, the complete process of compression & elongation is brought together and automated at each step of rolling the steel. Quality Control Unit, Procurement & Sales Division and Warehousing & Packaging Unit are the other important units of our organization that make carrying out production related tasks easy.

## Warehouse & Packaging

With the intention to store ferrous & non-ferrous metal in an orderly, safe and convenient manner, we have divided our spacious warehouse into a number of sections. It is well-ventilated & covers a wide area and helps us keep our products safely. For this purpose, we have also instructed and trained our storekeepers to handle the products properly. This implies that our products remain untouched by damages like corrosion with their physical properties remaining intact. The same is ensured even through the maintenance of the ideal temperature. Further, we have made proper arrangements to ward off accidents like fire by installing other amenities. Subsequently, we also provide customized packaging of our steel products. As a result of all these aids, we are able to deliver our products to the clients both in time as well as in perfect condition.

## Research & Development

Our highly evolved R & D unit has time and again proven to be very beneficial for us in bettering our range of steel products. It empowers us to stay abreast with the changing industry trends by discovering newer methods and technology of production through research. The employees working at our R & D branch are richly experienced in this field. They try their level best to update the technology used by us and bring down the cost of production through this means. Consequently, the quality of our range gets enhanced and is always in tandem with industry accepted norms, due to which it is in high demand in the market.

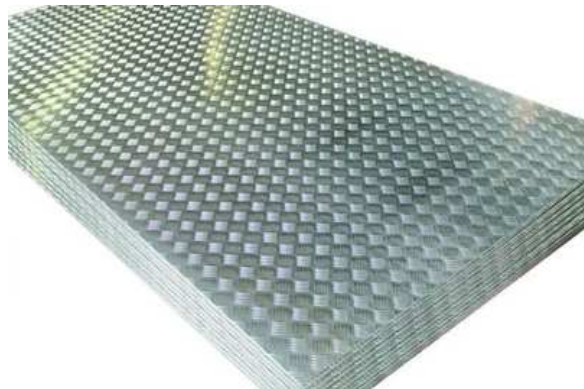

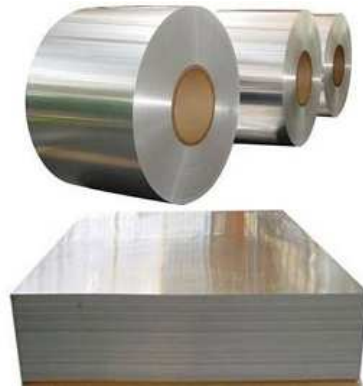

## We Deal with

## Products

Wide Range of Iron & Steel products available in various Sizes & Shapes
